Regarding claim 21, recites " a memoy unit storing executable by a processor " and regarding claim 33 , recites " a momery unit storing codes which when executed by a processor" in this case, the memory unit should supported by the specification i.e., RAM or ROM etc. this raises the 101 flag.

the memory unit storing executable by a processor , it is not clear that what the memory unit is storing and processor is executing in the recited claims. it should include an instruction or program that has to be executed by the processor.
